

His Eminence Gongkar Dorje Dhenpa Rinpoche and the Sangha at Gongkar Choede Monastery in India support & promote **Ecological Responsibility** as part of their Mahayana Dharma practice. They wish to add to the U.N. efforts to plant as many trees as possible as part of the growing global efforts to deal with rising carbon emissions. If you wish to support this noble endeavour, please offer what you by making a donation through our website: www.dzongpa.com for the planting of trees in our forest in Laldang Tibetan Community. We aim to plant as many fruit-bearing trees as possible so that this also contributes to the local community's dietary self-sufficiency.
